1.2	Subfolders	1
1.3	Key Contents	2

1 Project Documentation (docs/)

This folder contains supporting documents, workflow references, and metadata guides related to the **Regional Skew Estimation** project. Materials here are designed to be human-readable, versioned, and referenceable in publications, milestone reports, or modeling scripts. This folder complements the **reports/** folder, which contains milestone-specific logs, exploratory notes, and in-progress **.Rmd** analysis files.

1.1 Folder Purpose

The **docs/** directory serves as a centralized archive for:

- Project workflows and process documentation
- Metadata crosswalks and data dictionaries
- Proposal materials and final report drafts
- README-style files that describe the contents or purpose of other folders
- Files referenced in **.Rmd**, Quarto, or PDF outputs

1.2 Subfolders

The **docs/** folder is organized as follows:

```
docs/  
  archive/          # Proposal text, figures, letters  
  metadata/         # Variable definitions, units, and crosswalks  
    data-dictionaries/  
    descriptions/  
    look-up-tables/  
    QAQC/  
    raster-data-summaries/  
    vector-data-summaries/
```

1.3 Key Contents

File	Description
covariate_source_inventory.md	Dataset status and references
covariate_data_dictionary.pdf	Covariate metadata, data dictionary
best-practices_reference.md	Documentation, versioning, tagging, and changelog conventions
methods_covariate-selection.md	Covariate domains, stratification, and macrozone delineation methods
covariates_metadata.csv	Climate and terrain covariate metadata
