

README - reports/

C.J. Tinant

July 28, 2025

Contents

1	Project Documentation (reports/)	1
1.1	Folder Purpose	1
1.2	Subfolders	2
1.3	Key Contents	2

1 Project Documentation (reports/)

Formal results for external stakeholders. This folder contains final deliverables or near-final outputs to potentially share with reviewers, PIs, funders, or journals.

1.1 Folder Purpose

The `reports/` directory serves as a centralized archive for:

- PDF or HTML reports from `rmarkdown::render()`
 - Poster files (posterdown, LaTeX, PDF)
 - Quarto or RMarkdown manuscripts
 - Slide decks
 - Formal data appendices or export files
-

1.2 Subfolders

The `milestones\` folder contains reports of the purpose and expected outcome of a project step. Milestone reports are short project management captions that answer:

"What is this milestone for, and what will be completed when it's done?"

Reports in the `milestones` folder include discussion of the goal or question being answered, key tasks or processes, expected outputs, and dependencies or what the milestone builds on.

The `reports/` folder is organized as follows:

```
reports/
  20250415_pilot/          # Abstract and poster from pilot project
  milestones/              # Consise summaries of project steps
    milestone_00_project_structure_refact
    milestone_01_download_prepare_covariates
    milestone_02_documentation
```

1.3 Key Contents

File	Description
<code>milestone_00_project_structure_refact.pdf</code>	Project structure refactor
<code>milestone_01_download_prepare_covariates.pdf</code>	Acquire and validate data
<code>milestone_02_documentation.pdf</code>	Embed documentation within analysis folders and formalize metadata management
