Contents

1	Project Data (data/)	1
1.1	Folder Purpose	1
1.2	Subfolders	1

1 Project Data (data/)

This folder contains raw and processed data and supporting. Processed data are projected to a consistent geospatial format.

1.1 Folder Purpose

The `data/` directory serves as a centralized archive for:

- QAQC logs in `data/logs/`
- Metadata in xml format in `data/meta/`
- Processed data in `data/processed/`
- Raw data downloads in `data/raw/`

1.2 Subfolders

The `data/` folder is organized as follows:

```
docs/
  data/
    log/                # log files of downloads / processing steps
    meta/               # xml format metadata
    processed/          # Cleaned, derived datasets
      koppen-climate/
        |   koppen-geiger.tif   # Köppen Geiger climate raster 1991-2020
      modis/            # MODIS Terra Vegetation Indices,
        |   mod13a1_nvdi_timeseries
      ned/              # National Elevation Database (NED)
        |   elev_30m_gp.tif     # elevation raster for GP
        |   slope_30m_gp.tif    # slope raster for GP
      nhdphr/           # Natl Hydrology Dataset High Resolution
        |   nhdphr_flowlines_combined.gpkg # NHD HR flowlines for GP
        |   nhdhpr_catchments_combined.gpkg # NHD HR catchments for GP
```

```
